Case and Public Planning

The divisions manage and process the land use applications that are filed with the city. These applications are the first step in the project development process for residential, commercial or mixed-use projects. They also manage the application process for tenant improvements as well as home improvements, as required.

During the application review process, this division ensures that a proposed project meets the city's planning principles, zoning code and design and development standards.

Council Ward 3

Population increased by about 33 percent in Ward 3 between 1990 and 2000. The increase was fueled primarily by a 191 percent increase in the Hispanic population. During the same time, the White population decreased by 31 percent. The Hispanic population impacted Ward 3 age and gender as well. More than 40 percent of all Hispanics in Ward 3 are under 18 years of age. Hispanic males outnumber Hispanic females by approximately 4,800 in Ward 3 with nearly all of the difference occurring among those 18 to 44 years of age.

Educational attainment declined substantially in Ward 3 between 1990 and 2000 for both those with high and college diplomas. Median household income increased but did not keep pace with other council wards or the City as a whole. Those with poverty level income increased substantially going from 14.8 percent to 21.2 percent. Unemployment increased as well, going from just over 8 percent to 11 percent. Family households increased slightly during the ten-year span to include over 64 percent of all Ward 3 households.

The zoning in Ward 3 is consistent with the more mature areas in the city of Las Vegas. Residential classifications represent nearly 50 percent of the land area, with over 96 percent already built. Ward 3 contains less than one percent of the vacant, developable land in the city of Las Vegas. While the mean home price in Ward 3 is much lower than that of the city of Las Vegas (\$179,927 as opposed to \$308,957), the mean home price has increased by 68 percent in the last eight years.

Development activity in Ward 3 was strong for calendar year 2008, when compared to the city of Las Vegas as a whole. Ward 3 accounted for 25 percent of projects submitted for site plan development review. In addition more than half of the mixed use projects submitted in 2008 were in Ward 3. The building permit and completed project activity was lighter in Ward 3, with about nine percent of permit valuation and completed projects for the year taking place in Ward 3.
